

Project Summary

Office of Enterprise Technology Services

Project Name: Single Sign-On Azure AD B2C Support

Business Model: Fixed Rate

Project Overview

Problem – Currently there is no single sign-on service for all applications across the State. Most eHawaii.gov services use an eHawaii.gov (or Lala) login.

Solution – The State is moving to use Microsoft Azure Active Directory (AD) Business-to-Consumer (B2C) login. ETS has requested NIC Hawaii to integrate their eHawaii.gov login with Microsoft AD B2C. This first part of Phase 2 will be to build a working prototype for one eHawaii.gov service that utilizes the new SSO.

Additional Benefit – Constituents will be able to use the same login credentials to access multiple services across the State.
