

Project Summary

County of Hawaii Police Department

Project Name: HCPD Website Redesign

Business Model: Fixed Rate

Project Overview

Problem – Our current site has been live since 2011 and we’re in need of a redesign to create a site that has a more modern look and feel and includes a mobile friendly, responsive design. New content will be created for a timeline of the department’s 80-year history and more detailed information about recruitment and jobs. We’d also like to add these new features: an event calendar, a job board, and FAQs. A limited version of the old site will be kept available at hawaiipolice.com, which will contain only the media release archives.

Solution – We will work with Tyler Hawaii to redesign our site in WordPress.

Additional Benefits – A professionally designed website will instill credibility and trust and make the website more user friendly.
